

## **Tuscany Tree Replacement Guidelines**

Trees removed from the swales within the Tuscany subdivision must be replaced following the below guidelines:

- Only Class I or Class II trees (see linked document below) may be planted in the swales
- Class II trees require root mitigation efforts at planting and annually to avoid causing damage to sidewalks, roadways or sprinkler systems
- Conifers are not allowed in the swales
- Homeowners are requested to avoid trees that are especially susceptible to pests

Please review the Treasure Valley Tree Selection Guide for information on what qualifies as a Class I or Class II tree: [https://www.cityofboise.org/media/4078/tvtreeselectionguide\\_09\\_2018.pdf](https://www.cityofboise.org/media/4078/tvtreeselectionguide_09_2018.pdf)
